

STATE OF TENNESSEE  
DEPARTMENT OF TRANSPORTATION  
PLANNING DIVISION

May 1, 2026

Dear Mayors Tim Boaz and Tim Grace

TDOT has released the FY2027 statewide pavement project list, available at [Pavement Program](#).

We are sharing this information on pavement projects planned in your area to coordinate schedules, remain cost-effective, and avoid conflicts. If you are aware of upcoming utility work, projects, or community events that may affect these locations, and if you want any striping plan incorporated into the resurfacing plan, please notify Community Transportation Planning staff and the Regional Pavement Coordinator, no later than June 3, 2026.

Also, if your jurisdiction is considering changes to roadway striping—such as crosswalks, bike lanes, or modifications to the current layout—please inform the regional Pavement Coordinator so these can be incorporated into the project. Please review any of your recent planning documents that may have included recommendations related to your request. Where applicable, existing curb ramps along the route will be upgraded to meet ADA standards.

If you have any questions or need additional information, please contact the Regional Pavement Coordinator or the regional OCT staff.

**Attached are a list and a map of the pavement projects scheduled for your area.**
